MEMORANDUM

To: ALS Providers
(Via Email and US Mail)

From: Eric M. Rudnick, MD, FACEP, FAAEM
Medical Director

Date: July 6, 2010

Subject: Mucosal Atomized Devices and Allowed Medications

Currently, there are only two medications that have been approved for delivery intranasally - these medications are Versed and Narcan.

Please see the ALS protocols for the appropriate dosing since it is different from both the intravenous and intramuscular routes. Both these medications are absorbed readily intranasally (IN) and can be utilized when intravenous access is not available.

Please feel free to contact Nor-Cal EMS for any questions or concerns.
